SUMMARY

Full stack developer with four years of experience building customer-facing portals in C# and Angular for financial services clients.

WORK EXPERIENCE

Software Developer, Placeholder Financial | Jan 2023 - Present

- Built REST APIs in C# and ASP.NET Core that serve account and payment data to a customer portal with about 30,000 monthly users.
- Developed Angular and TypeScript features for the self-service portal, including document upload and payment history.
- Modeled the payments schema in SQL Server with Entity Framework Core migrations and tuned the three slowest queries.
- Set up build and release pipelines in Azure DevOps that deploy to Azure App Service.

Junior Developer, Demo Software Labs | Jul 2021 - Dec 2022

- Maintained internal tools written in C# and .NET Framework and fixed production defects reported by support.
- Wrote xUnit tests for the billing module, raising its coverage from 35% to 70%.
- Worked in two-week Scrum sprints and presented demos to product owners.
